Residential furniture and cabinetry

Model 3641 Interlock System

When only one drawer should open at a time, Accuride's rod-based interlock system is the solution. This reliable self-contained system is designed specifically for wide drawers in multi-drawer cabinets where tipping might occur due to weight shift.

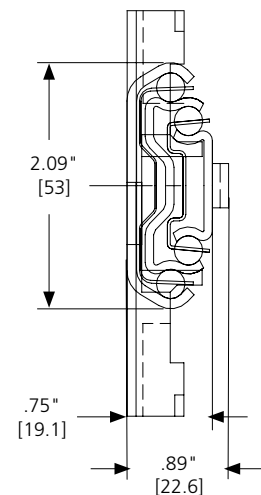

The interlock mechanism is integrated into the front of the slide assembly, which solves many of the installation and service issues associated with conventional locking system mounting in the rear of the cabinet.

Features & Benefits

- Up to **180-lb. load rating**
- Accommodates **drawers up to 42" wide**
- **1" over travel** provides complete access to drawer contents.
- One piece **rail-and-pocket** mount/disconnect system
- Interlock system ensures only one drawer will open at a time.
- **Front location** of interlock mechanism provides ease of installation.
- **Self-contained** system reduces installation time.
- **Sturdy rod and cam construction** requires no periodic adjustment.
- Compatible with optional central- or gang-locking systems.
- **Cut-to-length** aluminum connecting rods allow for varying drawer heights within the same cabinet.
- A pair of 3641 slides should be used in applications where a stronger interlock feature is required. For less demanding applications, Model 3641 may be paired with Model 3642, the non-locking companion slide.

Availability/Packaging

- Even lengths 14"-28" and 17"
- Clear zinc or black finish
