

# 3832EC *Easy-Close*

- Brings drawers to a gentle close
- Balanced pull force
- 1.75" stroke and auto reset

**Accuride**<sup>®</sup>  
Always Moving Forward

# 3832EC

## Easy-Close

Accuride's 3832EC provides the woodworking market with a high quality, reliable, soft-closing slide solution. This product is a great choice for commercial or institutional cabinetry and casework found in libraries, schoolrooms, laboratories or hospitals, and high-end retail stores. In residential applications, the quiet performance is valued in nearly every part of the home, especially in a child's room or baby's nursery.

### Features & Benefits

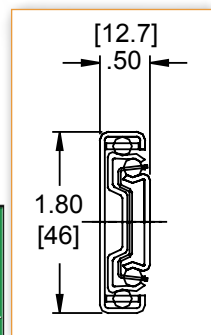

- 100-pound load capacity.
- Full extension for complete access.
- The Easy-Close mechanism has an automatic reset. The stroke on the mechanism is about 1.75", which is greater than other soft-close products on the market.
- Partially shielded mechanism prevents unwanted debris such as dust or finishing materials from entering and interfering with operation.
- Balanced pull-force: Engineered to provide a balance between the closing and opening actions, the drawer is less likely to pull out of the user's hand and unintentionally re-close.
- Lever disconnect for easy removal and reinsertion.
- Includes Cam Drawer Adjust feature.

### Availability

- Even lengths 14"–28"
- Finishes: zinc or black.

### Optional Kit

- Face Frame Bracket Kit:  
P/N 4180-0705-XE
