**Quick Reference**

- **Applications:** File drawers in desks, credenzas, and lateral files. Also store fixtures, hotel, or institutional furniture. Vertical drawer adjustment with rail cam. This product is covered by U.S. and various foreign patents issued and/or pending.

- **Side Space:** 1/2" + 1/32" x 2
- **Slide Lengths:** 12"–28"
- **Overall Slide Dimensions:** 3.79" x 1/2"
- **Load Rating:** 100–150 lbs.

- **Features:**
  - Progressive movement, positive stop, silenced in and out, handed, detent in
  - Slides and rails are handed. Left hand shown. Right hand opposite.

### Finishes:
- Bright electro-zinc (C) or black zinc (CB) plating available

### Lengths:
- 12"–28" [300 mm–700 mm]

### Height:
- 3.19" (3.79" including rail) [81.0 mm (96.3 mm including rail)]

### Movement:
- Models 4032/4034: 150 lb.** [68 kg.]
- Models 4033/4035: 100 lb.** [45 kg.]

**X** = "C" for zinc finish; or "B" for black finish

**Models 4032/4034: 18" slide cycled 75,000 times.**

**Models 4033/4035: 18" slide cycled 50,000 times.**
Installation Instructions

Conventional Mounting
Cabinet Member Installation
1. Mark a horizontal line in the cabinet sidewall 1 1/2" (11/16" min.) up from the cabinet floor to the center line of the cabinet member. Mark a point on the line 2-3/8" in from the cabinet front. This will position the slide flush with the cabinet opening. For inset drawers, add the drawer front thickness to this dimension. See Figure 1.
2. Measure the distance between the front and rear horizontal slots on the slide. Mark this measurement on the horizontal line beginning at the first mark.
3. Make a pilot hole on each mark, either with an awl or 1/8" drill. Install #8 screws through the front and rear horizontal slots.

Rail Installation
1. Mark a horizontal line on the drawer side 2-27/32" above the center line of the cabinet member. See Figure 3.
2. Mark a point on this line 5/8" back from the drawer front. Install #8 screw through the cam adjuster and through a slot at the rear. See Figure 3.

NOTE: The cam screw must install on the same center line as the remaining rail mounting screws. This eliminates additional measuring and marking.
3. Connect the drawer to the extended slide members by lowering the drawer onto the slides so the rail lock arm rests on top of the slide members approximately 1" from the front. Pull both slides forward until the rail latch locks securely into each slide.
4. Rotate the cam with a Phillips or Pozi screwdriver to vertically position the drawer in relation to the cabinet.
5. IMPORTANT: After all adjustments are made, secure rail with additional mounting screws.

32 mm System Mounting
Cabinet Member Installation
1. Install an M-6 euro screw through the second hole from the front of the slide and into a 5 mm hole located 37 mm in from the front of the cabinet. Select a rear mounting hole on one of the 32 mm multiples provided and install screws. See Figure 2.

Rail Installation
1. Mark a horizontal line on the drawer side 72.4 mm above the slide center line. See Figure 3.
2. Mark a point on this line 15.9 mm back from the drawer front. Complete rail installation by following steps 3 through 5 above.

Slide/Rail Ordering Instructions
Complete your slide order for models 4032, 4033, 4034, 4035 by specifying the total slides required, slide finish, slide model, slide length, and optional polybag packaging.
Example: 10 Each C 4034-12 D
Complete your rail order by specifying quantity, rail part number, rail finish ("C" for zinc; "B" for black) and hand ("L" for left hand; "R" for right hand).
Example: 10 Each 7156-1214-CL (zinc/left hand)
10 Each 7156-1214-BR (black/right hand)

Specifications
Slide members and ball retainers: Cold rolled steel
Ball bearings: Models 4032 & 4034: Carburized steel
Models 4033 & 4035: Acetal polymer
RoHs compliant

Packaging Information
Distributor (D) Pack: Polybag includes one pair of slides, rails, and screws. All lengths packaged 5 pair per box.
Bulk Pack: Slides and rails are packed in separate boxes. Lengths 12"–18", 20 each/box. Lengths 20"–28", 10 each/box.
X-Pack (X): Slides, rails, and screws are packed in one box. All models available. All lengths packaged 5 pair per box.
