The Global Leader in Movement Solutions

Designing and engineering the best solutions for access, positioning, and motion in any application, anywhere.
Let our Expertise Become Your Success.

Our global team of experts leverage years of proven knowledge and experience to serve your needs. We have developed innovative and dependable movement systems for Tier 1 suppliers and OEMs in major industries, from appliance to healthcare to automotive. Count on us for hands-on support on your project—from concept to final production.

Self-closing slides ensure drawers and trays close when they’re supposed to.

Narrow profile provides maximum drawer and tray space.

Specialty drawer slides include lubricants that don’t contaminate refrigerated contents.

Optional white coating handles cold environments without any loss of functionality.

Global Resources at Your Disposal

Roll-form machines. Plating lines. Steel mills. Accuride’s tremendous in-house resources allow us to tackle your projects, regardless of scale. Our substantial in-house resources, including manufacturing centers around the world, mean timely development and mitigated risk for your projects.
Solutions Tailored to Your Needs

Our team of engineers are leaders at problem-solving. We excel at building cost-effective, lightweight, and innovative solutions that seamlessly integrate into your designs. Our engineers bring decades of expertise in manufacturing and electrical engineering to the table. We’ll work closely with you to develop single components or even complete assemblies for your project. Rest easy: we have field support ready to help you with any challenge.

Built to the Highest Standards

Accuride facilities maintain the highest standard when it comes to quality and production. Our facilities are ISO 9001:2015- and 14011- certified, RoHS compliant, and meet or exceed ANSI standards. We also make customized testing available for unique applications.
Rapid Prototyping & Time-to-Market

Accuride’s model shops are equipped with advanced modeling systems, such as 3D printers and laser cutters. These assets allow us to develop prototypes using a wide range of materials—including aluminum, zinc, and steel—with or without plastic components. Additionally, our many progressive dies and roll-forms mean quick time-to-market.

Light-duty slides available with special features, such as hold-in detents, soft-close, and touch-release.

Corrosion-resistant friction guides require minimal servicing thanks to their simple, robust design.

Linear track system delivers sliding movement for machine guard.

Heavy-duty slide offerings support load capacities from 170 to over 1,300 lbs. Aluminum and stainless-steel options available.

Added Value. Low Lead Times.

Accuride offers many services, including inventory support, supply chain management, and warehousing. We have long-term partnerships with key vendors and back-up sources for raw materials. These measures ensure on-time delivery and the highest quality products at competitive cost – as well as an industry-leading warranty.
Our Markets
Accuride delivers custom and large-scale movement solutions for all markets

Appliance
- Oven racks
- Dishwasher trays
- Refrigerator & freezer compartments

Aerospace & Watercraft
- Sliding seats in airliners
- Cabinetry in ocean liners
- Pull-out trays

Healthcare
- Medical carts
- Nurse server stations
- Patient & supply storage

Cash Handling & Vending
- Cash registers
- Retail kiosks
- ATMs

Automation & Machinery
- Printers
- CNC machines
- Packaging & bottling systems

Transportation
- Generator storage
- Equipment pull-out
- Sliding consoles

Automotive
- Glove compartments
- Sliding armrests
- Adjustable seating

Telecom & Data Storage
- Server racks
- Blade servers
- Networking

Architecture
- Commercial cabinetry
- Residential fixtures
- Custom storage

RoHS COMPLIANT

Accuride has design facilities, manufacturing centers, and wherever the challenge, we're there to help.
